**Mobile Application Developer (Flutter)** with 2+ years of experience building, scaling, and stabilizing production Android and iOS applications. Specialized in clean architecture, modularization, performance optimization, and maintaining scalable Flutter codebases. Regularly involved in architectural decisions, refactoring initiatives, and delivery of complex production systems.

## SKILLS

- Languages: Dart (primary), C
- Frameworks & Tools: Flutter, Firebase, DevTools, CI/CD pipelines, Git
- State Management: GetX (primary), Provider .
- Database: Firestore, Realtime Database, MySQL, MongoDB.
- Integrations: REST & GraphQL APIs, Google Maps, WebSockets
- Engineering Practices: Clean Architecture, Dependency Injection, Code Generation, Modularization, Release Validation

## KEY ACHIEVEMENTS

- Contributed to ongoing development and optimization of Flutter applications by resolving bugs, enhancing features, and improving overall performance and stability.
- Contributed to end-to-end client-side architecture and delivery of complex mobile workflows.
- Improved debugging and refactoring efficiency through structured code reviews and modern developer tooling.

## EXPERIENCE

### Flutter Developer — Techflux Solutions                      September 2024 – Present

- Contributed to the development and enhancement of multiple production Flutter applications, implementing scalable features and improving overall application performance.
- Developed booking management systems with real-time notifications and live location tracking, ensuring smooth user and partner workflows across Android and iOS platforms.
- Implemented authentication systems, REST API integrations, PDF generation, ad-based monetization, and Google Maps integration to support business requirements.
- Collaborated with backend teams and designers to deliver pixel-perfect UI implementations and maintain clean, maintainable code architecture.
- Assisted in release management, build generation, and deployment processes for applications on the Google Play Store and Apple App Store.

### Associate Flutter Developer — Probity IT Services                      February 2024 – September 2024

- Worked in a team to develop and launch a matrimony application tailored for the Maratha community using Flutter and Firebase.
- Assisted in application deployment, testing, and successful publishing on the Google Play Store, including build generation and release management.

## EDUCATION

Master of Computer Applications (MCA) — SIMMC, Pune ( June 2022 – July 2024)
